As a member of a satellite radio service, I must say that I don't listen to broadcast radio much any more. I live in a rural area where we don't have a wide variety of radio programs or selection to choose from. I am a truck driver by trade and enjoy the convenience of being able to listen to traffic reports on demand. I believe the public should be able to listen to what they want when they want to listen, and not be limited to the choice of music because of the market that the person lives in. Please don't restrict satellite radio from offering programming because out dated commercial radio doesn't like the competition.
